This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

T. INGALTON AND SON, PRINTERS, ETON.

A COMPLETE SET OF MONTEM LISTS from 1773 to 1832, is presented to Etonians, who may possibly derive some gratification in seeing the "rank" they held in their "early military days," and in looking over the names of those with whom they were once so closely connected.

The lists were first printed in their present shape at the MONTEM in 1796; before that time they exist in manuscript only, and are consequently scarce:—there may possibly, therefore, be some "errata," both as to the order of the names and their orthography.

THE origin of MONTEM is involved in an obscurity which cannot now be satisfactorily dispelled, but it appears certain that its character was at first religious, and that it has existed from very early times. It is rather the aggregate of several circumstances gradually blended together, than a separate ceremony of itself. It is connected to a certain degree with the "Boy Bishop" known at Winchester and other places, and in part arose, probably, from Catholic customs which cannot now be traced; nor can it be ascertained why Salt Hill was the place to which the school proceeded. The small Tumulus or Mount existing at that place is doubtless of considerable antiquity; hence the appellation of Montem, and the very name of Salt Hill, must have originated from its connection with the ceremony.

Montem was held annually till about the year

1759, it then became biennial, and continued so till 1775; at that time a regulation was made that it should in future be held every third year, and so it has since continued. Till the year 1759, the first Tuesday in Hilary Term (Jan. 23) was Montem-Day; it was then transferred to Whit-Tuesday, as being a more seasonable period of the year, and probably also from the circumstance of the then Whitsuntide holidays having been transferred to those at election.

It would be interesting to ascertain at what period the military costume was assumed, and when the present distinctions and grades, from marshall down to corporal, were introduced. Many improvements were made by Dr. Barnard, before whose Mastership the procession did not exhibit the regularity of dress which distinguishes it at present; the costumes being chiefly furnished from the theatres and masquerade warehouses in London. The last remains of its religious character disappeared at the Montem in 1778; up to which period the "parson" and "clerk" were two prominent personages in the procession. They were always collegers, and repeated some prayers on the Mount. They appeared dressed as clergymen. This burlesque upon the clerical character was of itself a sufficient reason for the discontinuance of the practice, and it was particularly objected to by her late Majesty Queen Charlotte.

AD MONTEM. June 1st, 1773.
